

ARCHANA YARAMALA

Edison, NJ (Open to Relocate) | +1(732) 881-9869 | archana.ammul907@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Data Analyst with 3+ years of experience supporting financial services, client operations, KPI reporting, dashboard automation, and performance analytics across enterprise and service delivery environments. Strong background in analyzing transaction, account, client activity, SLA, exception, and operational data to improve reporting accuracy, visibility, and business decision-making. Experienced in SQL reporting, Power BI and Tableau dashboards, data validation, reconciliation, forecasting, and stakeholder reporting. Hands-on exposure to AI-assisted BI features such as Power BI Q&A, Smart Narrative, and Key Influencers to help business users interpret trends, exceptions, and performance changes faster. Known for translating business requirements into clear KPI logic, automated reports, and actionable insights for finance, operations, leadership, and cross-functional teams.

TECHNICAL SKILLS

Data Analysis & Programming: SQL, Python, Pandas, Advanced Excel, Data Cleaning, Data Transformation, EDA, Trend Analysis, Variance Analysis, Forecasting

Databases & SQL Reporting: SQL Server, Joins, CTEs, Window Functions, Aggregations, Data Extraction, Data Profiling, Data Reconciliation

BI & Data Visualization: Power BI, Power BI Service, Tableau Desktop, DAX, Power Query, Data Modeling, KPI Dashboards, Executive Dashboards, Operational Dashboards, Power BI Q&A, Smart Narrative

Reporting & Metrics: KPI Reporting, Ad Hoc Reporting, Scheduled Reporting, Report Automation, Operational Reporting, SLA Reporting, Exception Reporting, Performance Reporting, Management Reporting

Domain Analytics: Financial Operations Reporting, Client Operations Analytics, SLA Performance Analysis, Claims Analytics, Denial Trend Analysis, Reimbursement Reporting, Utilization Analysis

Data Quality & Compliance: Data Validation, Data Quality Checks, Data Standardization, Duplicate Detection, PHI/PII Handling, HIPAA/HITECH Compliance

Business Insight Delivery: Requirements Gathering, Root Cause Analysis, Process Improvement Analysis, Stakeholder Communication, Data Storytelling

AI-Assisted BI & Analytics: Power BI Q&A, Smart Narrative, Key Influencers, Decomposition Tree, Forecasting, Predictive Trend Analysis

PROFESSIONAL EXPERIENCE

Data Analyst

Jun 2025 - Present

Morgan Stanley | NJ, USA

- Analyzed 300K+ monthly transaction, client activity, account, and operations records with SQL, Python, Pandas, and Advanced Excel, uncovering process delays that improved reporting accuracy by 15%.
- Built Power BI dashboards with DAX, Power Query, KPI reporting, Q&A, and Smart Narrative for transaction volume, account activity, exception trends, and operations performance, improving visibility for 8+ users.
- Extracted client, trade, account, payment, and operational datasets through SQL Server joins, CTEs, window functions, and aggregations, strengthening accuracy across daily and monthly business reports.
- Standardized account status, transaction category, client segment, exception reason, and business unit fields with Python, Pandas, validation checks, and duplicate detection, reducing dashboard refresh issues.
- Investigated transaction exceptions, reporting gaps, and operational delay patterns through root cause analysis, variance analysis, and predictive trend analysis, identifying 3 major drivers behind processing delays.
- Automated weekly and monthly performance reporting with SQL extracts, Power Query transformations, Excel templates, and Power BI Service, cutting manual effort by 20% and reducing turnaround below 4 hours.
- Translated finance, operations, compliance, and business team requirements into KPI logic, dashboard filters, SQL rules, and report documentation, improving consistency across recurring management reports.
- Enhanced executive reporting with Power BI Key Influencers, Decomposition Tree, forecasting, and KPI trend views, helping leadership interpret transaction performance, exception volume, and operational changes faster.

Data Analyst

May 2021 - Jul 2023

Wipro | India

- Audited 500K+ monthly client operations, transaction, service, and reporting records with SQL, Advanced Excel, and data profiling, lowering data discrepancy errors by 18%.
- Designed Power BI and Excel dashboards for request volume, SLA performance, exception trends, pending workload, and turnaround time, giving managers visibility across 3 business reporting tracks.
- Queried operational, customer, transaction, and service datasets using SQL joins, aggregations, case statements, and date filters, making weekly reports faster and easier to validate.
- Profiled record IDs, status fields, business categories, transaction values, and exception codes through data quality checks and duplicate detection, strengthening report accuracy before stakeholder review.
- Mapped exception patterns, SLA delays, service categories, and recurring variance trends with EDA, forecasting, and predictive trend analysis, helping operations teams prioritize delayed items sooner.

- Defined KPI reporting logic, dashboard filters, metric calculations, Smart Narrative summaries, and report documentation from business requirements, improving consistency across client performance reports.
- Automated recurring client reports with reusable SQL extracts, Advanced Excel templates, pivot tables, and Power Query transformations, reducing manual reporting effort by 15–20%.
- Reconciled source files, internal trackers, operational reports, and dashboard outputs using SQL and Excel, catching missing records and inaccurate statuses before leadership reporting.

PROJECTS

Healthcare Claims & Revenue Cycle Analytics Dashboard

- Analyzed 100K+ healthcare claims records with SQL, Python, Pandas, and Advanced Excel to trace denial trends, payer delays, A/R aging gaps, and reimbursement patterns across RCM data.
- Transformed raw claims data through Power Query, data cleaning, duplicate detection, and data validation, creating a cleaner reporting dataset for denial rate, paid claims, pending claims, and claim turnaround metrics.
- Built Power BI KPI dashboards with DAX, data modeling, Power BI Q&A, Smart Narrative, and interactive reports, giving users payer-level visibility into denial categories, reimbursement gaps, and A/R aging performance.

Patient Readmission & Utilization Analysis

- Studied 50K+ patient records across 12 departments using Python, Pandas, SQL, and EDA to identify readmission drivers tied to demographics, visit frequency, utilization patterns, and length of stay.
- Validated patient-level datasets with data quality checks, data standardization, and duplicate detection, strengthening accuracy across department utilization, readmission rate, and outcome-based reporting.
- Created Tableau Desktop reports with trend analysis, forecasting views, and data storytelling, helping stakeholders compare department usage, high-risk patient groups, and readmission patterns.

Payer Performance & Claims Data Quality Scorecard

- Extracted payer, claim status, eligibility, payment, and denial data using SQL Server joins, CTEs, aggregations, and data profiling to track gaps across claims reporting and payer performance metrics.
- Designed Power BI scorecards with DAX, Power Query, KPI reporting, Key Influencers, and operational dashboards to monitor denial rate, missing fields, payment delays, and payer response trends.
- Reconciled RCM reports, payer reports, and healthcare claims data with Advanced Excel and data validation, catching inaccurate statuses and missing transactions before executive reporting.

EDUCATION

Master of Science in Information Technology

May 2025

St. Francis College, Brooklyn | New York, USA

Bachelor of Science in Computer Science

Jun 2022

Sree Vahini Institute of Science and Technology | India
